DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on April 11, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any US Patent issuing on from US Application Serial No. 10/128,064 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 1-54 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest an article of manufacture having a polymer substrate and a digitally encoded image made with ink, where the polymer substrate forms a lens, where the polymer substrate is subjected to a pre-treatment process that precedes the application of the digitally encoded image to the polymer substrate and where the pre-treatment process results in an enhanced image quality of the digitally encoded image. Also, the prior art does not teach or suggest an article of manufacture having a digitally encoded image made with ink having reactive components, where the polymer substrate forms a lens, where the digitally encoded image is applied to the polymer substrate by ink jet printing and where each reactive component is stored in an ink jet printer cartridge.

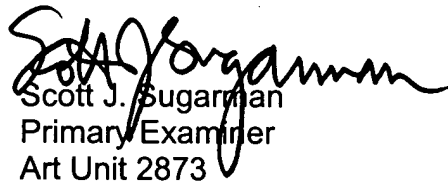

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
